## Preliminary Determination for an Air Quality Permit for

**NOTE:** Operator is Targa Midstream Services, L.P and the Owner is Versado Gas Processor, LLC

### Targa Midstream Service, L.P.

Targa Midstream Service, L.P. 1000 Louisiana Suite 4300, Houston, TX 77002 has submitted an air quality permit application to the Air Quality Bureau (aqb), New Mexico Environment Department (NMED) for an air quality permit to revise the permit for the Eunice North Compressor Station. The application file has been assigned Permit No. 0057-M7 and TEMPO Agency Interest ID No. 602. The exact location of the facility is at latitude 32 deg, 27 min, 0.41 sec and longitude -103 deg, 9 min, 47.6 sec To aid in locating this facility, the approximate location is] 1 mile north on state highway 207 from the intersection of Avenue O and HWY 207 in Eunice, Lea County, New Mexico.

The proposed permit revision for this natural gas compressor station will consist of permitting existing NOx, CO, VOC, SO<sub>2</sub>, and H<sub>2</sub>S emissions due to start up, shut down, and maintenance activities and no more than 10 tpy of each pollutant due to malfunctions.

Total air pollutant emissions to the atmosphere are estimated to be approximately Nitrogen Oxides (NO<sub>x</sub>) at 1212.6 tons per year (tpy); Carbon Monoxide (CO) at 348.6 tpy; Volatile Organic Compounds (VOC) at 109.4 tpy; Sulfur Dioxide (SO<sub>2</sub>) at 50.8 tpy; Total Suspended Particulate Matter (TSP) at 1.8 tpy, Particulate Matter 10 microns or less (PM<sub>10</sub>) at 1.8 tpy, Particulate Matter 2.5 microns or less (PM<sub>2.5</sub>) at 1.8 tpy; and Hydrogen Sulfide (H<sub>2</sub>S) at 16.3 tpy. These emission estimates could change slightly during the course of the Department's review of the application.

The NMED has conducted a preliminary review of the information submitted with the permit application. The preliminary review and applicant's dispersion modeling analysis indicates that the facility's air emissions will meet the ambient air quality standards for NO<sub>x</sub>, CO, SO<sub>2</sub>, TSP, PM<sub>10</sub>, PM<sub>2.5</sub>, and H<sub>2</sub>S. A full review will evaluate the estimated emission rates and the air quality dispersion modeling analysis to determine compliance with ambient air standards.

Based on the applicant's analysis, a preliminary determination is that this facility will comply with the requirements of Title 20, New Mexico Administrative Code (NMAC), Chapter 2, Parts 3, 7, 61, 72, 73, 75, and 77; 40 CFR 50; 40 CFR 60 Subparts A and JJJJ; 40 CFR 63 Subparts A and ZZZZ; and the New Mexico Air Quality Control Act. Therefore, the preliminary intent of NMED is to issue the air quality permit on or before October 6, 2011. This source is a major source according to 20.2.74 NMAC, PSD.

To ensure compliance with state and federal air regulations, the permit is expected to include conditions that limit the emissions and process rates, and conditions that will require record keeping and reporting to the Department.

The permit application is available for review in electronic or hard copy at the Air Quality Bureau Office, 1301 Siler Road, Building B, Santa Fe, New Mexico. To arrange viewing of this application contact Teri Waldron, at 505-476-4355 or [teri.waldron@state.nm.us](mailto:teri.waldron@state.nm.us). The permit application is also available at the NMED Hobbs Field Office located at 726 E. Michigan, Ste 165, Hobbs, NM 88240 for public review.

All interested persons have 30 days from the date this notice is published, to notify the Department in writing of their interest in the permit application. The written comments should refer to the company name, site name and Permit No. (or send a copy of this notice along with your comments). The written comments shall state the nature of the issues raised and how it relates to the requirements of applicable state and federal air quality regulations and the Clean Air Act. The written comments should be mailed to Cember Hardison, New Mexico Environment Dept., Air Quality Bureau, Permit Section, 1301 Siler Road, Building B, Santa Fe, New Mexico 87507-3113.

The Department will notify all persons who have provided written comments as to when and where the Department's analysis may be reviewed. Although all written comments will be made part of the public record, any person who does not express interest in writing before the end of this first 30 day period will not receive such notification.

If the Department receives written public comment before the end of the Department's 30 day public notice, the Department's analysis will be made available for review for 30 days at the NMED Hobbs field office nearest to the source before the permit will be issued. Written comments on the analysis or permit application may be submitted to the Department, attention Cember Hardison, during this second 30 day period or at any time before the permit is issued or denied.

Questions or comments not intended to be part of the public record can be directed to Cember Hardison at 505-476-4346. General information about air quality and the permitting process can be found at the Air Quality Bureau's web site. The regulation dealing with public participation in the permit review process is 20.2.72.206 NMAC. This regulation can be found in the "Permits" section of this web site.
